

Research Study for Kids with Fontan Heart Surgery - Liver Function

For kids who have had the Fontan Surgery completed on their heart, doctors work hard to help you keep your body healthy. Our research team wants to help.

Who can participate in this study?

- People 8 years and older
- Have had a Fontan operation to treat a diagnosed congenital heart defect
- Able to swallow a pill
- No metal in the body/pacemaker

A one-time payment of \$250 as a thank you for participating. Courtesy hotel stay upon request.

Why are we doing this study?

The purpose of this research study is to see how two different FDA-approved medications are processed by the liver and cleared from the body in patients with Fontan circulation.

What happens during the study?

- One 13-14 hour visit at CMH Adele campus
- Take 2 different FDA approved drugs
- IV access for blood draws
- Physical Exam
- MRI of the abdomen
