

# Good Food, Good Family, Good Antibiotic Prescribing

Holidays are right around the corner! For many this means good food, family time, or sometimes more spread of infections. Read below about the important questions to ask for all patients who may need antibiotics. Click [here](#) for more.

**Does this patient need antibiotics?** Not always! Click [here](#) to see when antibiotics work.

**What cultures should I get?  
What antibiotic should I start?**  
[Nurses](#) and [pharmacists](#) can be helpful here!

**Culture results are available.  
Can I change or stop antibiotics?**  
Click [here](#) for help interpreting susceptibilities.

**How long are antibiotics needed?**  
Choose the shortest possible! Click [here](#) for recommendations.
